Performance Insight
Business Improvement Toolbox

ttiglobal
People Driving Change

Analyze and optimize your business operations.

TTi Global's Performance Insight program allows organizations, managers and their staff to gain greater insight into their business and personal performance using a single, web-based application. Powerful and highly flexible, it allows managers to quickly perform assessments based on predetermined criteria, then create detailed reports and generate corrective action plans aligned to best practices.

AUDIT AND ACTIONS
Audit and evaluate with pre-determined parameters

QUALITY INSPECTION
Check work quality and compliance standards

SKILL ASSESSMENT
Assess employee skills and subject expertise

PERFORMANCE BY NUMBERS
Evaluate employees on their domain knowledge

Performance Insight empowers you to quickly and easily understand:

- Business performance to a quality standard
- Staff skills, knowledge and capability
- The quality of a business against a total network
- How to plan and improve business standards
- Key performance indicators and results

Performance Insight
Business Improvement Toolbox

Highly flexible assessment and reporting capabilities.

■ **Multiple Assessment Methods**
Implement as auditor-led, self-assessments or as remote surveys. Examine, analyze, report and plan actions from individual staff to business and whole networks.

■ **Flexible Reporting**
Access and share powerful reports – view high-level metrics and KPIs, or drill down to review specific questions and answers, all in real-time.

■ **Automatic Action Plan Generation**
Generate intuitive action plans from assessments for review and implementation.

■ **Multi-Level User Permissions**
Provide the right access to the right people – from a business privilege level to a multi-regional program or central management monitoring.

■ **Easy-to-Use File Management Protocols**
Manage assessment creation and publication through a simple, easy-to-use central module.

■ **Multi-Language Support and Processing**
A multi-language processing module allows users to export complete audits, then translate and import them back to the system.

> "The solution also generates action plans based on best-practice improvement insights."
